

Corrections

Sorry to disturb you once more but after some discussion we have decided to waive the software requirement for the prelims. You are required to submit the technical ppt/ word proposal and the content video introducing your team and your idea to the judges .

You would be required to build and show your software with a live demo plus show on the site of finals itself if you are selected .

Thanking you once again for expressing interest in our event and feel free to contact us in case of any further queries

Regards
Team Hackathon
