

Submission Guidelines

Project Proposal to compete against other students.

- This should be a Microsoft Word or PDF document no longer than ten pages, or a PowerPoint presentation no longer than twenty slides, which explains your project and your team:
 - Who your team is?
 - What your project does?
 - Who your project is for?
 - How you will bring your project to market?
- Presentation Video – 3 minute pitch and demo video as if presenting live to judges

Apart from a word/ ppt proposal (please include as much details as possible so that a proper evaluation can be made) we also need a 5-10 min video from your side where we would like you to introduce yourselves and your team and briefly explain your project in your own words (such as your motivation, implementation etc) this video will also contribute towards evaluation.

** The Source code is not Important for Prelims. If you want you can include but it won't be included in the judgement process for Prelims.*
